

Release Notes:  
EDCKMS Version 2.1

New Features over the Version 2.0 are:

1. Provides the facility to create a user friendly dynamic Website, using EDCKMS as a background Engine and custom template.
2. The navigational links of the created website are purely based on the role of the user and are generated dynamically.
3. SEARCH can be performed with respect to the user and his/her role. The search RESULTS generated are categorized and represented through Tree-View which provides faster understandability.
4. Uploaded documents has been provided with a security level based on the user's role and the company s/he belongs to, for more secure.
5. Provides the facility to authenticate the active directory users.
6. Provides the facility to approve a document before publishing.
7. Users can publish webpages without developing any code.
